

DEPARTMENT OF GENERAL SURGERY

Page 1: OVERVIEW

Department of surgery, GMC Nandurbar got established in 2019 with an aim to shoulder the responsibility of providing patient-centered care integrated with comprehensive undergraduate and postgraduate teaching, research and training using advanced learning and investigative tools that will result in stepwise achievement of milestones towards acquisition of competency in an Indian medical graduate.

With a vision of becoming world-class leading institution, department of surgery promises to professionally train both undergraduate and postgraduate students with highest quality of skill through innovative and methodological teaching in most sophisticated and modest way. As a department in a premier educational and Health science institute, we will provide excellent patient care service through evidence based practice of surgery, and promoting training and research which is affordable, innovative and relevant to the needs of the society. We, as a team of Surgeons working in department of surgery have a vast teaching and clinical experience and our clinical objectives are achieved through close collaboration with other specialties and support departments.

The department's futuristic plans include procurement of laparoscopic simulators, a well established skills lab and to start robotic and bariatric surgeries. This incorporation and implementation of newer technology in teaching, learning and evaluation will result in making of globally competitive, competent and confident surgeons who will engage in ethical practice of the science and art of surgery.
