

## **INTRODUCTION**

The Department of Forensic Medicine and Toxicology was established in the year 2019, to cater to the needs of the tribal students of Nandurbar region in the State of Maharashtra. It is located on the ground floor of the main building complex of the college. We now regularly run an undergraduate teaching programme for about 100 medical students who come to us for two years, and during this period they are trained in all medicolegal matters which they are likely to face in their professional life.

The department currently comprises of One Professor, One Associate Professor, Two Assistant Professors and three Senior Residents posts, technical, academic and administrative staff. It has demo room which is audio visually well equipped for interactive teaching and a library with rich collection of various medico legally relevant books. The department of Forensic Medicine is engaged in teaching, research and training of medical students. The faculty members have publications in peer reviewed scientific journals and some are reviewers of international, national and regional journals. Many academic contributions to popular undergraduate and postgraduate books happened from the esteemed faculty of this department.

### **Vision**

- To promote, propagate, and practice various aspects of forensic medicine and toxicology for the welfare of State and Judiciary and our Country men.
- To establish toxicology garden having common toxic plants.
- To start Post-graduate Degree & Diploma.

### **Mission**

- To give rise to a Doctor who is well informed and knowledgeable about medico-legal responsibilities which arise during medical practice.
- To educate the students about various codes of medical ethics, etiquettes and consumer protection act.
- To prepare the students on issues related with medical negligence and the various ways to prevent and defend.
- To provide integrated lectures in collaboration with other departments.

### **Best Practices**

- Special Lecture conducted in every Semester on important topics.
- Revision Classes conducted at the end of Semester for Students.
- Mentorship Programme for Undergraduate Student.
